

5-July-2022

Dear Valued Customer,

We all thought we were out of the woods concerning increases, but we have just been informed of more raw material issues throughout the industry. The demand in gasoline has affected the benzene prices and therefore polystyrene. We are not sure what will happen next, but effective Aug 1, 2022:

All Polystyrene product up to +10 %

SLP has also incurred an increase in Acrylic but at this time, we will absorb the increase.

Stay healthy and be safe!
